## MEASURING KEY

**A** = Around the bust/chest (full circumference)

**B** = Around your waist (largest circumference point usually around the belly button)

**C** = From top of shoulders to the top of your belt line on your back.

A	
B	
C	

## TIPS FOR MEASURING

1. Do not pull tight on tape measure, this is an 'over garment' and does not stretch to fit.
2. For chest, measure around the highest point of your bust/chest.
3. For your waist, measure the largest circumference point, usually around the belly button.
4. Measure from the top of your shoulders to the top of your belt line on your back.

## Torso Lengths:

	38 - 43 cm	15 - 17 inches
Short		
Regular	46 - 51 cm	18 - 20 inches
Long	53 - 61 cm	21 - 24 inches

Please inform us if your job requires a lot of sitting (ie. driving) as well as standing as this will determine the length for a comfortable fit.
